## THE ORTHOPEDIC CENTER - UNDER CONSTRUCTION

Fisher Architecture has provided full architectural and interior design services for additions and renovations to the building that will become The Orthopedic Center in Easton, Maryland. A total of 5,000 s.f. will be added to the first floor, and a total of 8,900s.f. will be added to the second in order to create a space large enough for the intended tenants.

Fisher was also hired by University of Maryland Shore Medical Health (UMMS) for the interior improvements of the three new spaces at the Orthopedic Center. Now under construction, this state of the art Medical Center will allow patients of The Orthopedic Center to be treated by a physician, perform Physical Therapy, and have Out-Patient Surgery, all in one building.

Construction is being completed by Willow Construction of Easton, MD.  
Fisher and Willow also partnered to build UMMS' Denton Medical Pavilion  
that was completed in 2019.

## UAS Airport Hangar Facility Breaks Ground! January 27, 2020

Salisbury-Wicomico Regional Airport broke ground for one of their many upcoming projects! Fisher Architecture provided Interior space planning and architectural design for the Unmanned Aircraft Systems (UAS) facility for the Salisbury-Wicomico Regional Airport.

**Sunday, March 8, 2020 at 11am-5pm**

**Monday, March 9, 2020 at 11am-4pm**

Ocean City Convention Center  
5700 Coastal Hwy,  
Ocean City, MD 21842

Keith Fisher had the opportunity to meet with TAD (Thinking and Doing) students at Westside Intermediate and Fruitland Intermediate schools. He was able to help the students understand what an Architect does in their profession. The students are studying Architecture and were tasked with proposing a plan and designing structures and then presented. Keith Fisher was happy to help out by evaluating their work and presentations. "Like in years past, I was very impressed with all the students. They had some great ideas and really put forth a lot of effort. I always look forward to volunteering my time with the TAD students," said Fisher.
